

Wren Rust

3022500471 | wren.rust@gmail.com | Wilmington, DE

Environmental engineering student passionate about integrating skills in CAD, ArcGIS, and engineering design with a background in visual communication to develop functional, impactful solutions.

Education

University of Delaware — Newark, DE

B.S. Environmental Engineering, Minor in Coastal & Marine Geoscience | Expected May 2029

Cab Calloway School of the Arts — Wilmington, DE

Visual Communications Career Pathway | May 2025

Skills

Engineering & GIS: AutoCAD, Fusion 360, ArcGIS Pro, 3D Modeling

Programming: Python, HTML, CSS, Web Design

Design: Adobe Illustrator, InDesign, Photoshop, Premiere Pro, After Effects

Research & Engineering Projects

NOAA East Coast Ocean Acidification Cruise | Seawater Chemistry Research

- Used automated titration systems, pH calibration techniques, and Gran titration methods to measure seawater total alkalinity.
- Contributed data supporting research into changing ocean conditions and ocean acidification.

Engineers Without Borders | Ceramic-Biochar Water Filtration System

- Collaborated on the development of low-cost ceramic water filtration systems for communities in Malawi.
- Investigated ceramic porosity, firing temperatures, and biochar integration to evaluate filtration performance.

Independent Research | Native Plant Naming and Marketability

- Analyzed 273 survey responses using two-proportion z-tests to evaluate the effect of plant naming conventions on consumer purchase intent.
- Investigated how environmental communication and terminology influence perceptions of native plants.

Experience

Student Assistant | 10/2025 - Present | Research Data and Design Commons | Newark, DE

- Provide technical support to patrons with technology, including computers, printers, digital resources, data visualization, and multimedia equipment.
- Support creation of multimedia content for campus research and programming; manage digital media equipment circulation.

Swim Instructor | 07/2025 - Present | YMCA of Delaware | Wilmington, DE

- Teach swimming, water safety, and aquatic skills through individualized lessons; track progress and attendance for 25+ students.

Youth Conservation Corps | Summers 2022-24 | Delaware State Parks | Wilmington, DE

- Supported conservation education and projects including trail maintenance, invasive species management, habitat stewardship, and animal care.
- Completed training in Mid-Atlantic inland and coastal environmental conservation.
